

Subject: - Cyber Security Advisory – Latest Android Patches/Updates/Fixing Zero Day Vulnerabilities (Advisory No. 55)

05 OCT 2023
C(A&F)

S(coord)

Recently, Google has applied patches to Android OS versions 11, 12 and 13 via Google Play Protect service, fixing 32x flaws including one zero-day vulnerability; CVE-2023-35674 (privilege escalation flaw affecting android framework further leading to remote code execution). These updates are floated only for android devices running OS version 11 and above.

2. Above in view, all android OS users are advised to enable Google Play Protect service to receive notifications for latest updates. Also, devices running android OS version 10 and below are advised to update to the latest versions (11 or above)

3. Kindly disseminate the above information to all concerned in your organizations, all attached/affiliated departments and ensure necessary protective measures.
