Cyber Security Advisory – Microsoft Patches 59 x Vulnerabilities Including 2 x Zero Days (Advisory No. 61)

Microsoft has issued patches for 59 x CVEs including two zero-day bugs (details as listed below):

- a. Microsoft Streaming Service Proxy Privilege Escalation (CVE-2023-36802).
- b. Microsoft Word Information Disclosure Vulnerability (CVE-2023-36761)

2. Above in view, administrators and users of all Microsoft products are advised to update (devices/applications) to the latest patched version (as of 12 September, 2023 or above) from Microsoft's official support (www.support.microsoft.com).

3. Kindly disseminate the above information to all concerned in your organizations, all attached/affiliated departments and ensure necessary protective measures.
