

Subject: - Cyber Security Advisory – Juniper Releases Sep 2023 Critical Patch Update (Advisory No. 60)

Juniper Networks has released Critical Patch Updates for Sep, 2023. The update addresses five vulnerabilities i.e. CVE-2023.36844 - 202336847 and CVE-2023.36854 in J-Web component. These CVEs affect Junos OS (SRX firewall and EX switch). Consequently, an attacker can remotely exploit them to take control of an affected system/device.

2. Above in view, all Juniper product users and administrators are requested to apply necessary updates as per device specifications from Juniper's official support (www.supportportal.juniper.net).

3. Kindly disseminate the above information to all concerned in your organizations, all attached/affiliated departments and ensure necessary protective measures.
