**Subject:** Cyber Security Advisory – Critical Vulnerabilities in Android Versions-11 and Above (Advisory No. 12)

Recently, Google has released security updates to address critical vulnerabilities (CVE-2023-20951; CVE-2023-20954) for devices running android versions 11, 12 and 13 and older. In addition, devices running android versions 10 and older have reached End of Life (EoL).

2. Successful exploitation of these vulnerabilities could allow an attacker to perform Remote Code Execution (RCE) without any user interaction and with no additional execution privileges required.
3. Users of affected versions are advised to update to the latest version (minimum android 11 or above) immediately.
4. Kindly disseminate the above information to all concerned in your organizations, all attached/affiliated departments and ensure necessary protective measures.
