

Subject: - Cyber Security Advisory – Microsoft Patches for 61x Vulnerabilities in March, 2024 Updates (Advisory No. 07)

Introduction. Recently, Microsoft has issued patches for 61x CVEs (Common Vulnerabilities and Exposures) including two critical flaws (CVE-2024-21334; Microsoft Open Management Infrastructure Remote Code Execution Vulnerability: CVE-2024-21400; Microsoft Azure Kubernetes Privilege Escalation Vulnerability) being actively exploited.

2. Above in view, administrators and users of all Microsoft products are advised to update their devices/applications to the latest patched version.

3. Kindly disseminate the above information to all concerned in your organizations, all attached/affiliated departments and ensure necessary protective measures.
